Environmental Policy

The company acknowledges the importance of protecting the environment. In this direction it is implementing a certificated environmental management system according to standard **ISO 14001:2004**, in order for the production processes taking place in the business, to become more environmentally friendly.

In this framework the administration is committed to:

- Determine the environmental performance standards for each production process in accordance with existing environmental laws and regulations.
- Develop operational procedures aimed at preventing environmental pollution gradually through goals and programs, to improve the level of environmental protection, reducing waste resulting from current activities, promoting recycling or reuse, as well as the transportation and destruction of waste.
- Present the information on its environmental performance to the staff and any interested party, as may be required.
- Minimize the probability of environmental accidents, and have the capacity to cope with the pollution that may result from such an accident.
- Collaborate with suppliers, partners, customers in order to help them develop an interest in environmental protection.
- Promote appropriate training to staff, in order to assure that it is able to operate according to the commitments of the current environmental policy.
